

christopher zerbe

calling all radios

Greetings music lovers,

I am available on a limited basis for the following:

1. Song Production; get your track(s) to the polished professional level. We discuss your goal for 'vibe' then I produce the necessary elements to achieve that end result.
2. Guitar Parts; I have 21 hand-selected acoustic and electric guitars that cover a wide variety of sonic tones and colors (Les Paul, SG, Strat, Tele, Flying V, 12-string, nylon, and many odd-ball models with unique tonal 'attitudes'), as well as a large collection of rare boutique vintage effects and a giant library of customized amp tones.
3. Vocals; I can sing your lead melody or add background harmonies to fit your lead vocal track. I have several dynamic / condenser / tube mics that produce a wide variety of textures that will fit perfectly within your track.

My studio is equipped with a 100% Apogee high-level front end with Big Ben master clock. I use API and/or Apogee pres depending on what is needed per track and have a variety of outboard equipment that produces fully professional sonic results. (*each track on 'Calling All Radios' was recorded using this equipment only)

Rates are competitive. Contact me directly for details and let's talk about how I can help your project lock in a 100% professional release-quality level.

A handwritten signature in black ink that reads "Christopher Zerbe".
